## Actions to Take During a Flood

Unplug electrical appliances; do not touch sockets if they are wet.

Turn off water, electricity and gas supplies.

If possible, quickly seek higher ground or evacuate the area.

Avoid watching the flood and raging rivers.

If possible and if you have enough time, move your important belongings and documents to the upper floors of your house.

Supervise children's entry and exit from the house and avoid walking in flowing water.

As little as 15 cm of moving water can destabilize a person's balance, disrupt vehicle control and cause them to stop.
